

TAKE QNXT™ TO THE NEXT LEVEL

Cumberland[®]
consulting group

DRIVE EFFICIENCIES. IMPROVE PERFORMANCE. MAXIMIZE YOUR INVESTMENT.

With *everything* riding on your core claims and administration systems, you need a partner with a deep understanding of your business and the evolving industry, as well as the technology expertise to help you drive efficiencies, improve performance and maximize the return on your TriZetto[®] QNXT investment.

A leader in healthcare consulting, Cumberland Consulting Group has the proven experience you need to implement or extend your core systems. Our consultants are certified on the QCSI QMACS product and have worked on implementation, upgrade and other related projects throughout QNXT product history – from QMACS 4.10 through QNXT 5.0.

- Coordination of Benefits (COB)
- Medicare/Medicaid
- Membership
- Premium Billing/Accounts Receivable
- Provider Setup
- Provider Contracts
- Specialty Lines of Business (e.g., Dental, Disability and Life)

QNXT CONNECT SERVICES

If your health plan has unique business requirements that QNXT Connect does not support “out of the box,” Cumberland can help you implement and operate QNXT Connect successfully.

We have broad experience in healthcare electronic data interchange (EDI), having worked with most X12 transactions mandated by HIPAA in both the 4010A and 5010 transaction sets. We understand the specific challenges confronting health plans engaged in 5010 compliance efforts and have experience with many legacy EDI formats superseded by HIPAA (but still in use) and with healthcare transactions in areas that are not addressed or only partially addressed by HIPAA.

QNXT CONNECT EXTENSION

We have demonstrated experience developing QNXT Connect “add-ins” to address anomalies and provide enhanced functionality for healthcare payer operations beyond what is contained in the core TriZetto product.

CLAIMS LIFECYCLE MANAGEMENT

We have experience developing workflows and applications that address gaps in the standard TriZetto offering, which are necessary for smooth operation of QNXT Connect throughout the claims lifecycle.

BIZTALK TRADING PARTNER CONFIGURATION

The process for setting up and troubleshooting trading partners in BizTalk is complex and can be difficult to understand. We can help you set up the trading party, configure receive ports and locations, and implement 997 and 999 acknowledgements.

HIGHLY EXPERIENCED.

Cumberland has the proven experience to help your organization implement, extend and support your QNXT solution.

Contact us today to learn more about our QNXT-related services.
